PROJECTS

REAL ESTATE MANAGEMENT | February 2026 - May 2026

- The Real Estate Management System is a web-based application designed to simplify the process of buying, selling, and renting properties. It provides an easy-to-use platform where users can search properties based on location, price, and property type. Property owners or agents can add, update, and manage property listings, while customers can view complete property details, including images, descriptions, and contact information. The system helps reduce paperwork, saves time, and improves communication between buyers, sellers, and real estate agents. It offers secure data management and a user-friendly interface, making property management more efficient and reliable.
